VOLUME SUBJECT INDEX

A

- Acetylcholine, 653
 cerebral arteriolar dilation, 295
 contracting sinoatrial node cells, 253
 Acidosis, extracellular, slowing of recovery, 513
 Actin and grafting, 102
 Action potential, 633
 myoplasmic shortening, 825
 young chick embryonic hearts, 497
 Active subthreshold properties, local response, 486
 Adenine nucleotides
 cellular damage, 816
 effects on whole heart ischemia, 816
 Adenosine
 coronary vasoactivity, 116
 current-voltage curves, 309
 isoproterenol, 309
 Adenosine diphosphate, inhibitory effect, 575
 Adenosine triphosphatase
 actin-activated myosin, 565
 calcium-activated, 565
 effect of magnesium on activity, 382
 effect of pH on activity, 382
 relation of recovery of function of ischemic hearts, 816
 tissue levels, 816
 Adenosine triphosphate
 mitochondrial generation of, 168
 relaxation in vascular smooth muscle, 468
 Adenylic cyclase, stimulation of the receptor by forskolin, 116
 Adrenaline, 689
 Adrenergic antagonists
 ketanserin, 642
 prazosin, 642
 yohimbine, 642
 Afferents
 sympathetic, 532
 vagal, 532
 Afterdepolarization
 action potential, 110
 amplitude and coupling interval, 110
 antiarrhythmic drugs, 110
 Aldosterone-induced hypertension, 349
 Allopurinol
 inhibition of free radical formation, 545
 xanthine oxidase activity, 545
 Amiodarone
 chronic administration, 277
 conduction time and velocity, 277
 sodium channel block, 277
 Amphiphiles
 acyl carnitine, 135
 acyl CoA, 135
 altered membrane function, 135
 lysophospholipids, 135
 L-palmitoyl carnitine, 585
 palmitoyl lysophosphatidylcholine, 585
 palmitoyl lysophosphatidylethanolamine, 585

- platelet-activating factor, 585
 Anatomy, description of fiber types, 794
 Angina physiology model, 203
 Angiotensin, interruptions of angiotensin-renin system, 575
 Angiotensin I-converting enzyme
 inhibition, 669
 proximal tubule function, 669
 Angiotensin II, altered renal function, 669
 Animal
 cats, 707
 chick heart, 39
 dogs, 1, 31, 110, 116
 dog hearts, 59
 newborn piglets, 780
 newborn rat, 49
 rat, Sprague-Dawley, 78
 rat, Wistar-Kyoto, 18
 sheep lung microsomes, 707
 spontaneously hypertensive rats, 392
 Antiarrhythmic agents
 amiodarone, 277
 bretylium tosylate, 653
¹²⁵I-iodocyanopindolol, 376
³H-prazosin, 376
 quinidine, 376
³H-yohimbine, 376
 Antimyosin, heavy chain antibodies, 794
 Arachidonic acid
 cerebral arterioles, 295
 combined with catalase, superoxide dismutase, 295
 Arginine vasopressin
 interaction with sympathetic nervous system, 454
 response to vagal cold block, 454
 Arrhythmias
 acetylcholine cycle length and pacemaker period, 89
 picotoxin-caused, 404
 prevention by blocking conduction, 185
 reperfusion-induced, 545
 Arterioles
 aortic, 286
 pial, "sausage string," 286
 Assay, phospholipid methyltransferase, 504
 Atrial rate, 835
 atropine, 835
 propranolol, 835
 Atrial receptors, 660
 Atropine, 835
 atrial rate, 835
 contraction, 835
 Automaticity, effects of lidocaine, 185
 Autoregulation, 554
 macro- and microcirculatory evidence, 609
 metabolic in cerebral arterioles, 249
 role in hypertension development, 609

B

- Back pressure, 10

- Baroreceptor arterial, reflexes, 763
 Baroreceptors, 660
 activity with catecholamines, 18
 aortic, 18
 denervation, 532
 Baroreflexes
 arterial, 440
 carotid and aortic interaction, 740
 Basement membrane, alveolar and capillary, 155
 Bay k 8644, binding studies, 549
 Bicuculline, 404
 Biochemistry
 adenylate cyclase stimulation, 116
 calcium sensitivity, 565
 contractile proteins, 565
 damage to ischemic myocardium by glycolytic products, 816
 esterification of free fatty acids, 135
 free radical-induced lipid peroxidation, 120
 membrane fluidity, 585
 metabolism of incorporated exogenous amphiphiles, 585
 myocardial reperfusion injury, 168
 sarcolemma preparation, 585
 Bioengineering, myocardial infarction analysis, 805
 Block, local anesthetic, 513
 Blood pressure, active immunization against tonin, 580
 Blood vessels, cerebellar, 575
 Bradykinin, intracoronary injection, 532
 Brain, 549
 Bretylium tosylate
 anti-arrhythmic agent, 653
 2-bromo-N-ethyl-N,N-dimethylbenzothiazolamium p-toluene sulfonate, 653
 Brief Review
 antiarrhythmic drug action, 427
 cardiac contractile proteins, 565
 lipid metabolism, 135
 tight junctions, 723

C

- Calcium
 binding assays, filtration vs. centrifugation, 676
 binding, effect of pH, 382
 cation channels, 497
 changes in middle cerebral artery diameter, 197
 channels, 227
 chlorotetracycline probe, 595
 depression of sarcoplasmic reticulum, 176
 effect of strophanthidin on concentration, 830
 effect on ventricular expansion, 59
 excitation-contraction coupling, 176
 fast skeletal muscle myofilaments, 382
 free calcium concentration, 830
 homeostasis measure, 595
 independent noradrenaline release, 689

- intracellular calcium concentration measurements, 830
 maximum activated force, 565
 myocardial contractility, 676
 myoplasmic free calcium concentration, 825
 ouabain-induced oscillatory afterpotentials, 497
 overload, 227
 paradox, 227
 Quin 2 to measure concentration, 830
 sensitivity of the contractile system, 565
 sodium-calcium exchange, 227
 sodium-calcium interactions, 676
 sodium-sensitive binding sites, 676
 steady state uptake, 176
 stimulation of currents by Bay k 8644, 549
 uptake and ATPase activity, 176
 uptake and release, 595
- Calcium antagonists
 nicardipine, 336
 nisoldipine, 336
 nitrendipine, 336
 verapamil, 336
- Calcium current, influence of depolarization frequency, 336
- Calcium inward current
 changes in net membrane current, 309
 changes in peak current, 309
 time constants of inactivation, 309
- Calcium ionophore A23187, 176, 416, 468, 595, 676
- Calcium repletion, sodium loading, 227
- Calsequestrin, presence in sheep Purkinje fibers, 267
- Capacitance
 magnitude and site of coronary arterial, 751
 vascular waterfall formation, 751
- Carbachol, 416
- Cardiac arrhythmias, triggered activity, 110
- Cardiac automaticity, 253
- Cardiac cycle length
 atropine, 835
 propranolol, 835
- Cardiac energetics, external mechanical work, 734
- Cardiac function, contractile changes, 805
- Cardiac glycoside action, 497
- Cardiac muscle, contractions, 825
- Cardiac pacemaker cells, 67
- Cardiomechanics
 ejection timing, 31
 estimates of capacitance, 751
 Frank-Starling mechanism, 59
 left ventricular end-diastolic distensibility, 203
 left ventricular relaxation rate, 31
 length-dependent activation, 59
 length-tension relations, 59
 load-bearing capacity, 1
 loading sequence, 31
 oxygen consumption, 734
 pressure and ventricular distension, 59
 pressure flow studies, 751
 pressure-segment length relations, 203
 pressure-volume trajectory in left ventricle, 734
 regional elastance in the intact heart, 326

Circulation Research

An Official Journal of the American Heart Association

VOLUME 55

July-December

1984

AMERICAN HEART ASSOCIATION, INC.

Circulation Research

An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology, and pharmacology. The journal also will accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

Editor

FRANCOIS M. ABBOUD

Associate Editors

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME 55

July-December 1984

No. 1 (July)

Mechanical Properties of Resting and Active Isolated Coronary Arteries. <i>Jo G. De Mey and Dirk L. Brutsaert</i>	1
Flow into Ischemic Myocardium and across Coronary Collateral Vessels is Modulated by a Waterfall Mechanism. <i>Calvin Eng and Edward S. Kirk</i>	10
A Direct Excitatory Action of Catecholamines on Rat Aortic Baroreceptors in Vitro. <i>William F. Goldman and William R. Saum</i>	18
Ejection Timing as a Major Determinant of Left Ventricular Relaxation Rate in Isolated Perfused Canine Heart. <i>Masatsugu Hori, Michitoshi Inoue, Masafumi Kitakaze, Katsuhiko Tsujioka, Yoshio Ishida, Masatake Fukunami, Shigeru Nakajima, Akira Kitabatake, and Hiroshi Abe</i>	31
Effects of Growth in Low Potassium Medium or Ouabain on Membrane Na,K-ATPase, Cation Transport, and Contractility in Cultured Chick Heart Cells. <i>Donghee Kim, James D. Marsh, William H. Barry, and Thomas W. Smith</i>	39
In Vitro Adrenergic and Cholinergic Innervation of the Developing Rat Myocyte. <i>William J. Marvin, Jr., Dianne L. Atkins, Valerie L. Chittick, Donald D. Lund, and Kent Hermismeyer</i> ...	49
Length Dependence of Activation Studied in the Isovolumic Blood-Perfused Dog Heart. <i>Paulo J.F. Tucci, Edson A. Bregagnollo, Joel Spadaro, Antonio C. Cicogna, and Mario C.L. Ribeiro</i>	59
Origin of the Background Sodium Current and Effects of Sodium Removal in Cultured Embryonic Cardiac Cells. <i>R. Hardwin Mead and William T. Clusin</i>	67
Regulation of Myocardial and Vascular α-Adrenergic Receptor Affinity: Effects of Guanine Nucleotides, Cations, Estrogen, and Catecholamine Depletion. <i>Wilson S. Colucci, Michael A. Gimbrone, Jr., and R. Wayne Alexander</i>	78
A Mathematical Model of the Effects of Acetylcholine Pulses on Sinoatrial Pacemaker Activity. <i>Donald C. Michaels, Edward P. Matyas, and Jose Jalife</i>	89
Adaptation of Canine Saphenous Veins to Grafting: Correlation of Contractility and Contractile Protein Content. <i>Charles L. Seidel, Robert M. Lewis, Rebecca Bowers, Richard D. Bukoski, Han-Seob Kim, Julius C. Allen, and Craig Hartley</i>	102
<hr/>	
BRIEF COMMUNICATIONS	
The Time Course of Action Potential Repolarization Affects Delayed Afterdepolarization Amplitude in Atrial Fibers of the Canine Coronary Sinus. <i>Berthold Henning and Andrew L. Wit</i>	110
Forskolin Potentiates the Coronary Vasoactivity of Adenosine in the Open-Chest Dog. <i>Shozo Kusachi, William J. Bugni, and R.A. Olsson</i>	116
Differential Sensitivity of Canine Cardiac Sarcolemmal and Microsomal Enzymes to Inhibition by Free Radical-Induced Lipid Peroxidation. <i>Jay H. Kramer, I. Tong Mak, and William B. Weglicki</i>	120
<hr/>	
INSTRUCTIONS TO AUTHORS	125
NEWS FROM THE AMERICAN HEART ASSOCIATION	129

No. 2 (August)

BRIEF REVIEW

- Amphipathic Metabolites and Membrane Dysfunction in Ischemic Myocardium.**
Peter Corr, Richard W. Gross, and Burton E. Sobel 135
- Binding of Charged Ferritin to Alveolar Wall Components and Charge Selectivity of Macromolecular Transport in Permeability Pulmonary Edema in Rats.**
Jerome S. Brody, Charles A. Vaccaro, Nicolas S. Hill, and Sharon Rounds 155
- In Vitro Study on Contribution of Oxidative Metabolism of Isolated Rabbit Heart Mitochondria to Myocardial Reperfusion Injury.**
Hajime Otani, Hidehiko Tanaka, Takeo Inoue, Masao Umemoto, Kazuo Omoto, Kazuho Tanaka, Tadashi Sato, Tsutomu Osako, Atoh Masuda, Akira Nonoyama, and Terumasa Kagawa 168
- Characterization of Cardiac Sarcoplasmic Reticulum Dysfunction during Short-Term, Normothermic, Global Ischemia.**
Stephen Krause and Michael L. Hess 176
- The Effects of Lidocaine and Quinidine on Impulse Propagation across the Canine Purkinje-Muscle Junction during Combined Hyperkalemia, Hypoxia, and Acidosis.**
Joseph J. Evans, Robert F. Gilmour, Jr., and Douglas P. Zipes 185
- Pressure-Dependent Membrane Depolarization in Cat Middle Cerebral Artery.**
David R. Harder 197
- Left Ventricular Diastolic Pressure-Segment Length Relations and End-Diastolic Distensibility in Dogs with Coronary Stenoses: An Angina Physiology Model.**
Shin-ichi Momomura, Arlene B. Bradley, and William Grossman 203
- Interpretation and Physiological Significance of Diastolic Coronary Artery Pressure-Flow Relationships in the Canine Coronary Bed.**
William P. Dole, Guillermo M. Alexander, Alan B. Campbell, Elmer L. Hixson, and Vernon S. Bishop .. 215
- Calcium, Sodium, and the Calcium Paradox.**
Winifred G. Nayler, Sue E. Perry, Jennifer S. Elz, and Michael J. Daly 227
- Arterial and Venous Coronary Pressure-Flow Relations in Anesthetized Dogs: Evidence for a Vascular Waterfall in Epicardial Coronary Veins.**
Paul N. Uhlir, Robert W. Baer, Gus J. Vlahakes, Frank L. Hanley, Louis M. Messina, and Julien I. E. Hoffman 238

BRIEF COMMUNICATIONS

- Increased Venous Pressure Causes Myogenic Constriction of Cerebral Arterioles during Local Hyperoxia.**
Enoch P. Wei and Hermes A. Kontos 249
- The Isolated Sinoatrial Node Cell in Primary Culture from the Newborn Rat.**
William J. Marvin, Jr., Valerie L. Chittick, Jane K. Rosenthal, Alexander Sandra, Dianne L. Atkins, and Kent Hermmsmeyer 253
- In Vivo ³¹P Nuclear Magnetic Resonance Measurements in Canine Heart Using a Catheter-Coil.**
Howard L. Kantor, Richard W. Briggs, and Robert S. Balaban 261
- Evidence for the Pressure of Calsequestrin in Both Peripheral and Interior Regions of Sheep Purkinje Fibers.**
Annelise O. Jorgensen, Anne G. McLeod, Kevin P. Campbell, and Gerald H. Denney 267

NEWS FROM THE AMERICAN HEART ASSOCIATION 271

No. 3 (September)

- Block of Inactivated Sodium Channels and of Depolarization-Induced Automaticity in Guinea Pig Papillary Muscle by Amiodarone.**
Jay W. Mason, Luc M. Hondeghem, and Bertram Katzung 277
- Effects of Chronic Hypertension and Sympathetic Nerves on the Cerebral Microvasculature of Stroke-Prone Spontaneously Hypertensive Rats.**
Andrew H. Werber and Donald D. Heistad 286
- Oxygen Radicals Mediate the Cerebral Arteriolar Dilation from Arachidonate and Bradykinin in Cats.**
Hermes A. Kontos, Enoch P. Wei, John T. Povlishock, and Carole W. Christman 295
- Phasic Vascular Sodium Pump Changes in Deoxycorticosterone-Hypertensive Rats.**
Emel Songu-Mize, Steven L. Bealer, and R. William Caldwell 304

Ionic Basis for the Antagonism between Adenosine and Isoproterenol on Isolated Mammalian Ventricular Myocytes.	
Gerrit Isenberg and Luiz Belardinelli	309
Regional End-Systolic Pressure-Length Relationships Using a Volume-Loading Technique in the Intact Pig Heart.	
William P. Miller, A. James Liedtke, and Stephen H. Nellis	326
Voltage-Dependent Block of Calcium Channel Current in the Calf Cardiac Purkinje Fiber by Dihydropyridine Calcium Channel Antagonists.	
Michael C. Sanguinetti and Robert S. Kass	336
Metabolic and Mechanical Properties of Aortas from Aldosterone-Salt Hypertensive Rats.	
E. Garwitz McMahon and R.J. Paul	349
A Computer Study of the Left Ventricular Performance Based on Fiber Structure, Sarcomere Dynamics, and Transmural Electrical Propagation Velocity.	
R. Beyar and S. Sideman	358
Quinidine is a Competitive Antagonist at α_1 and α_2-Adrenergic Receptors.	
Harvey J. Motulsky, Alan S. Maisel, Marshall D. Snively, and Paul A. Insel	376
Inhibition of the Activation and Troponin Calcium Binding of Dog Cardiac Myofibrils in Acidic pH.	
Edward M. Blanchard and R. John Solaro	382
Altered Cerebral Vessel Innervation in the Spontaneously Hypertensive Rat.	
Tony J.-F. Lee and Akira Saito	392
Blockade of Central Nervous System GABAergic Tone Causes Sympathetic-Mediated Increases in Coronary Vascular Resistance in Cats.	
Sharon A. Segal, Thomas Jacob, and Richard A. Gillis	404

BRIEF COMMUNICATIONS

Receptor Mechanisms in the Human Epicardial Coronary Artery: Heterogeneous Pharmacological Response to Histamine and Carbachol.	
Robert Ginsburg, Michael R. Bristow, and Kathleen Davis	416

ERRATUM	421
NEWS FROM THE AMERICAN HEART ASSOCIATION	422

No. 4 (October)

BRIEF REVIEWS

Antiarrhythmic Drug Action: Blockade of the Inward Sodium Current.	
Augustus O. Grant, C. Frank Starmer, and Harold C. Strauss	427
Changes in Vascular Capacity in Awake Dogs in Response to Carotid Sinus Occlusion and Administration of Catecholamines.	
Tom D. Bennett, Craig R. Wyss, and Allen M. Scher	440
The Role of Vasopressin and the Sympathetic Nervous System in the Cardiovascular Response to Vagal Cold Block in the Conscious Dog.	
Eileen M. Hasser, Joseph R. Haywood, Alan Kim Johnson, and Vernon S. Bishop	454
Countercurrent Diffusion in the Renal Cortex of the Rabbit.	
Richard M. Effros, Kenji Taki, Ellen Reid, and Phillip Silverman	463
Mechanisms of Adenosine Triphosphate-, Thrombin-, and Trypsin-Induced Relaxation of Rat Thoracic Aorta.	
Robert M. Rapoport, Martin B. Draznin, and Ferid Murad	468
Histamine-Induced Rhythmic Contraction of Hog Carotid Artery Smooth Muscle.	
Philip G. Stein and Steven P. Driska	480
Determinants of Postrepolarization Refractoriness in Depressed Mammalian Ventricular Muscle.	
George J. Rozanski, Jose Jalife, and Gordon K. Moe	486
Properties of Oscillatory Afterpotentials in Young Embryonic Chick Hearts.	
Michio Kojima and Nick Sperelakis	497
Sarcolemmal Phosphatidylethanolamine N-Methylation in Diabetic Cardiomyopathy.	
Pallab K. Ganguly, Kevin M. Rice, Vincenzo Panagia, and Naranjan S. Dhalla	504
Lipid Solubility Modulates pH Potentiation of Local Anesthetic Block of \bar{V}_{max} Reactivation in Guinea Pig Myocardium.	

<i>Archer Broughton, Augustus O. Grant, C. Frank Starmer, Jayne K. Klinger, Bruce S. Stambler, and Harold C. Strauss</i>	513
Rapid Recovery of Cardiac β-Adrenergic Receptors after Isoproterenol-Induced "Down"-Regulation. <i>Constantinos J. Limas and Catherine Limas</i>	524
Phenol Topically Applied to Canine Left Ventricular Epicardium Interrupts Sympathetic but Not Vagal Afferents. <i>Michael J. Barber, Thomas M. Mueller, Becky G. Davies, and Douglas P. Zipes</i>	532
<hr/>	
BRIEF COMMUNICATIONS	
Ischemia and Reperfusion-Induced Arrhythmias in the Rat: Effects of Xanthine Oxidase Inhibition with Allopurinol. <i>Allan S. Manning, D. John Coltart, and David J. Hearse</i>	545
Effects of Bay k 8644, a Dihydropyridine Analog, on [3H]Nitrendipine Binding to Canine Cardiac Sarcolemma and the Relationship to a Positive Inotropic Effect. <i>Paul L. Vaghy, Ingrid L. Grupp, Gunter Grupp, and Arnold Schwartz</i>	549
Evidence of Myogenic Vascular Control in the Rat Cerebral Cortex. <i>H. Glenn Bohlen and Scot L. Harper</i>	554

BRIEF REVIEWS

Regulation of Cardiac Contractile Proteins: Correlations between Physiology and Biochemistry. <i>Saul Winegrad</i>	565
<hr/>	
Vasopressin Causes Endothelium-Dependent Relaxations of the Canine Basilar Artery. <i>Z.S. Katusic, J.T. Shepherd, and P.M. Vanhoutte</i>	575
Lack of Evidence for the Participation of Tonin in the Pathogenesis of One-Kidney, One-Clip Renovascular Hypertension. <i>Shinji Seto, Sara F. Rabito, A. Guillermo Scicli, and Oscar A. Carretero</i>	580
Modulation of Canine Myocardial Sarcolemmal Membrane Fluidity by Amphiphilic Compounds. <i>Karen L. Fink and Richard W. Gross</i>	585
Intracellular Calcium Storage and Release in the Human Platelet: Chlorotetracycline as a Continuous Monitor. <i>Wenche Jy and Duncan H. Haynes</i>	595
Hemodynamic and Microvascular Responses in the Hindquarters during the Development of Renal Hypertension in Rats: Evidence for the Involvement of an Autoregulatory Component. <i>Gerald A. Meininger, Vince M. Lubrano, and Harris J. Granger</i>	609
Development of Collateral Function with Repetitive Coronary Occlusion in a Canine Model Reduces Myocardial Reactive Hyperemia in the Absence of Significant Coronary Stenosis. <i>Hideo Yamamoto, Hitonobu Tomoike, Hiroaki Shimokawa, Shozo Nabeyama, and Motoomi Nakamura</i> ..	623
Developmental Changes in the Effects of Lidocaine on the Electrophysiological Properties of Canine Purkinje Fibers. <i>Yoshiyuki Morikawa and Michael R. Rosen</i>	633
The Effects of α_2-Adrenergic and Serotonergic Receptor Antagonists on Cyclic Blood Flow Alterations in Stenosed Canine Coronary Arteries. <i>Larry R. Bush, William B. Campbell, Katherin Kern, Gregory D. Tilton, Phillip Apprill, Juliet Ashton, James Schmitz, L. Maximilian Buja, and James T. Willerson</i>	642
Interaction of Bretylium Tosylate with Rat Cardiac Muscarinic Receptors: Possible Pharmacological Relevance to Antiarrhythmic Action. <i>Gabriel Schreiber, Menachem Friedman, and Mordechai Sokolovsky</i>	653
Dynamic Discharge Characteristics of Low Pressure Receptors in the Rat. <i>Steven Mifflin and Diane Kunze</i>	660
Role of Angiotensin II in the Altered Renal Function of Congestive Heart Failure. <i>Iekuni Ichikawa, Janice M. Pfeffer, Marc A. Pfeffer, Thomas H. Hostetter, and Barry M. Brenner</i>	669
Sodium-Sensitive Calcium Binding to Sarcolemma-Enriched Preparations from Canine Ventricle. <i>Mary B. Frankis and George E. Lindenmayer</i>	676
Release of Endogenous Catecholamines in the Ischemic Myocardium of the Rat: Part A: Locally Mediated Release. <i>Albert Schömig, Anthony M. Dart, Rainer Dietz, Eckart Mayer, and Wolfgang Kübler</i>	689

Release of Endogenous Catecholamines in the Ischemic Myocardium of the Rat: Part B: Effect of Sympathetic Nerve Stimulation. <i>Anthony M. Dart, Albert Schömig, Rainer Dietz, Ekart Mayer, and Wolfgang Kübler</i>	702
Analysis of Responses to Leukotriene D₄ in the Pulmonary Vascular Bed. <i>Philip J. Kadowitz and Albert L. Hyman</i>	707
NEWS FROM THE AMERICAN HEART ASSOCIATION	718

No. 6 (December)

BRIEF REVIEWS

Tight Junctions: Their Structure, Composition, and Function. <i>Eveline E. Schneeberger and Robert D. Lynch</i>	723
Independence of Myocardial Oxygen Consumption from Pressure-Volume Trajectory during Diastole in Canine Left Ventricle. <i>Hiroyuki Suga, Yoichi Goto, Osamu Yamada, and Yuichiro Igarashi</i>	734
Interaction of Canine Carotid Sinus and Aortic Arch Baroreflexes in the Control of Total Peripheral Resistance. <i>Martha J. Brunner, Andrew S. Greene, Clayton H. Kallman, and Artin A. Shoukas</i>	740
The Role of Vascular Capacitance in the Coronary Arteries. <i>Jinku Lee, David E. Chambers, Satoshi Akizuki, and James M. Downey</i>	751
Altered Control of Hindlimb Vascular Resistance by Vagal Afferents in Spontaneously Hypertensive Rats: Difference in the Early and Late Stages of Hypertension. <i>Sumio Hoka, Akira Takeshita, Kunihiko Yamamoto, Naoya Ito, Toshiaki Ashihara, and Motoomi Nakamura</i>	763
The Vasopressor Response to Centrally Administered Ouabain. <i>R. William Caldwell, Emel Songu-Mize, and Steven L. Bealer</i>	773
Cardiovascular Effects of Leukotrienes in Neonatal Piglets: Role in Hypoxic Pulmonary Vasoconstriction? <i>Charles W. Leffler, John A. Mitchell, and Robert S. Green</i>	780
Effects of Pericardial Effusates of Various Conductivities on Body-Surface Potentials in Dogs: Documentation of the Eccentric Spheres Model. <i>Daniel A. Kramer, Robert L. Hamlin, and Herman R. Weed</i>	788
Fiber Types and Myosin Types in Human Atrial and Ventricular Myocardium: An Anatomical Description. <i>Patrice Bouvagnet, Jocelyn Leger, Françoise Pons, Claude Dechesne, and Jean J. Leger</i>	794
An Analysis of Myocardial Infarction: The Effect of Regional Changes in Contractility. <i>Daniel K. Bogen, Alan Needleman, and Thomas A. McMahon</i>	805
Role of Glycolytic Products in Damage to Ischemic Myocardium: Dissociation of Adenosine Triphosphate Levels and Recovery of Function of Reperfused Ischemic Hearts. <i>James R. Neely and Lee W. Grotyjohann</i>	816

BRIEF COMMUNICATIONS

The Effects of Shortening on Myoplasmic Calcium Concentration and on the Action Potential in Mammalian Ventricular Muscle. <i>Max J. Lab, David G. Allen, and Clive H. Orchard</i>	825
Measurement of Cytosolic Free Calcium Concentration in Isolated Rat Ventricular Myocytes with Quin 2. <i>Shay-Shing Sheu, Virendra K. Sharma, and Shailesh P. Banerjee</i>	830
Temporal Changes in the Sympathetic-Parasympathetic Interactions that Occur in the Perfused Canine Atrium. <i>Yasuyuki Furukawa and Matthew N. Levy</i>	835
